

**REMARKS**

Entry of the above amendments prior to examination is respectfully requested.

**I. Amendments**

Support for new claims 4-12 is readily apparent from the teachings of the specification and from the original claims 1-3. Specifically, support can be found on pages 1, and 4-6 of the specification. Accordingly, no new matter has been added by these new claims.

New claims 13-21 recite a kit comprising an unsaturated fatty acid composition comprising linoleic fatty acid (n-6, 18:2) and  $\alpha$ -linolenic fatty acid (n-3, 18:3), wherein the weight ratio of said linoleic fatty acid to said  $\alpha$ -linolenic fatty acid in the composition is 0.05-7.5. The kit further comprises instructions to administer the composition to a subject in order to strengthen a brain function selected from the group consisting of visual identification, recognition and learning faculty, and memory. Support for these claims can be found on page 2, line 25 through page 3, line 5 and on page 5, line 7 through page 6, line 25.

No new subject matter has been added by way of these amendments.

If in the opinion of the Examiner a telephone conference would expedite the prosecution of the subject application, the Examiner is encouraged to call the undersigned at (650) 838-4410.

Respectfully submitted,
